Biotechnology Courses

What is Biotechnology?

Biotechnology is technology based on biology, especially when used in agriculture, food science, and medicine. Biotechnology also means any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use. It is basically the manipulation of organisms to do practical things and to provide useful products. Biotechnology deals with the directed usage of organisms for the manufacture of organic products like beer and milk products.

Biotechnology is also used to recycle, treat waste, clean up sites contaminated by industrial activities. In a nutshell, biotechnology is the application of existing scientific methods and techniques aimed at improving the biological systems which include micro-organisms, plants and animals. Biotechnology plays a major role in serving mankind by contributing to industries like agriculture, animal husbandry, health care...

Scope of Biotechnology in India

The scope of biotechnology in India is enormous as it is a field that involves engineers, biologists, and many other such professionals. According to a survey conducted by Ernst and Young, Asia is set to become a hotbed for biotechnology related research and development and India is supposed to emerge as a destination which will see a notable expansion in the biotechnology sector.

The areas where biotechnology has grown in India include Bioinformatics, Agricultural biotechnology, Bio fertilizers, National Bioresource Development, Plant Biology, Marine Biotechnology and the like.

How to pursue Biotechnology courses

There are various manners in which you can study biotechnology - like you can opt for undergraduate Biotechnology courses which includes B.Sc, B.E, B.Tech, 5-year integrated B.Tech/M.Tech) and at PG level (Msc/ M.Tech). You can also pursue specialized courses at research level. Biotechnology offers PG courses, which you can opt for after graduating in Physics, Chemistry, Biology and Microbiology. After your PG, you can go in for PhD after which you can go in for Post-doctoral research. Here, we would like to mention that students usually prefer to do PhD and Post-doctoral research from abroad.

Undergraduate Biotechnology Courses

1.Andhra Pradesh Biotechnology Colleges

Biotechnology Colleges In Andhra Pradesh		
Name & Address	Course	Min. Eligibility
ICFAI Insitute of Science & Technology 62, Nagarjuna Hills, Punjagutta Hyderabad 500082 www.icfaitech.org	B.Tech. In Biotechnology	60% marks in 10+2 or equivalent exam. With PCM.
Audhishankara College of Engg. & Technology. Gudur Mandal, Nellore 524101 Phone: 08624-272042	B.Tech. In Biotechnology	
AL-Ameen College of Engg. & IT Gudilova, Anandapura, Vishakapatnam 531162 (A.P.) Phone: 0893-2523419/420	Degree course in Biotechnology	
Alfa College of Engineering & Technology Alagadda, Kurnool (A.P.) Phone: 08159-221357 Email: alfacet@rediffmail.com	Degree course in Biotechnology	
Anil Neerukonda Institute of Tech. & Science Sanghivalasa, Bheemunipatnam, Vishakapatnam (A.P.)	Degree course in Biotechnology	

2.Delhi Biotechnology Colleges

Biotechnology Colleges In Delhi		
Name & Address	Course	Min. Eligibility
University of Delhi Delhi 110007	B. Tech in Biotechnology	
Guru Govind Singh Indraprastha University Delhi College of Engineering Building, Kashmere Gate Delhi-06 Phone: 011-23863536 www.ipu.ac.in	4+2 years B.Tech/M.Tech (Intergrated) in Biotechnology	Passed 10+2 with minimum aggregate of 55% (PCB)

Combined Biotechnology Entrance Examination 2006
SYLLABUS -Biotechnology Entrance Exam Pattern

The question paper for the Entrance Examination will be of three hours duration and divided into two parts:

Part A will have multiple choice type questions at the level of 10+2. This part is sub-divided into Section-I, II and III. Section I will have 40 questions from Physics and Chemistry and must be answered by all the candidates. Section-II will have 20 questions from Mathematics and Section-III will have 20 questions from Biology. Candidates will have option to answer questions from either Section-II or III. Total marks for Part A will be 60 questions x1 mark each = 60 marks. There will be negative marking and for each wrong answer, $\frac{1}{2}$ (half) mark will be deducted.

Part B will also have multiple-choice questions of Bachelor's level requiring thinking and analysis. There will be about 40 questions from Physics and Mathematics, about 40 questions from Biology (e.g., Botany, Zoology, Biochemistry, Microbiology, Genetics and Molecular Biology) and about 20 questions from Chemistry. The candidates will be required to attempt 60 questions. Total marks for Part B will be 60 questions x3 marks each = 180 marks. There will be negative marking and one mark for each wrong answer will be deducted.
